Cooperated with BASF engineer,
the colors of sport tiles are durable.

Suitable Site & Recommendation

ANK5

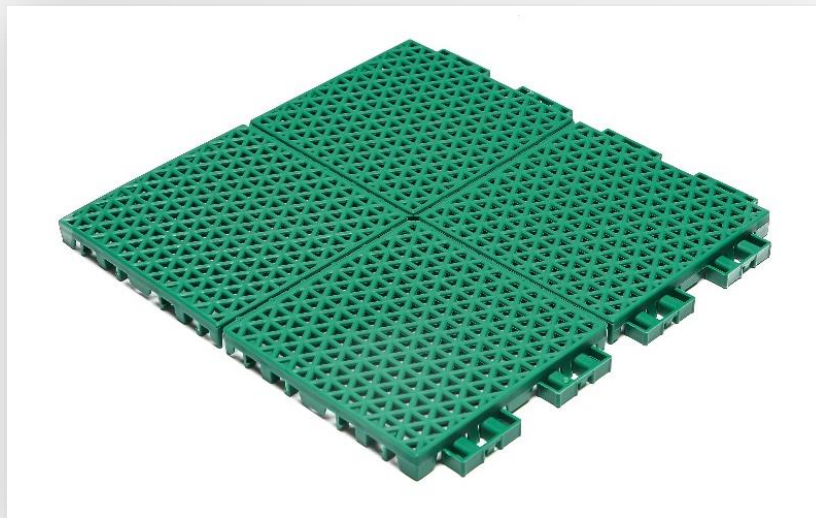

All Star composed of 25 small squares, which forms a force-bearing unit, effectively reduce bulging problem caused by thermal expansion and contraction in large venues. Up to 80% flatness, ensure anti-slip performance, while larger force area reduces body damage when falling.

Advantage	25 units reduces bulge problem caused by thermal expansion and cold contraction
Special	Large contact surface enhance the safety and avoid contusion
Cost	middle
Courts	all kinds of courts
Dimension	50*50*1.45CM
Use	Short construction period and easy to maintain

For School

ANK2F

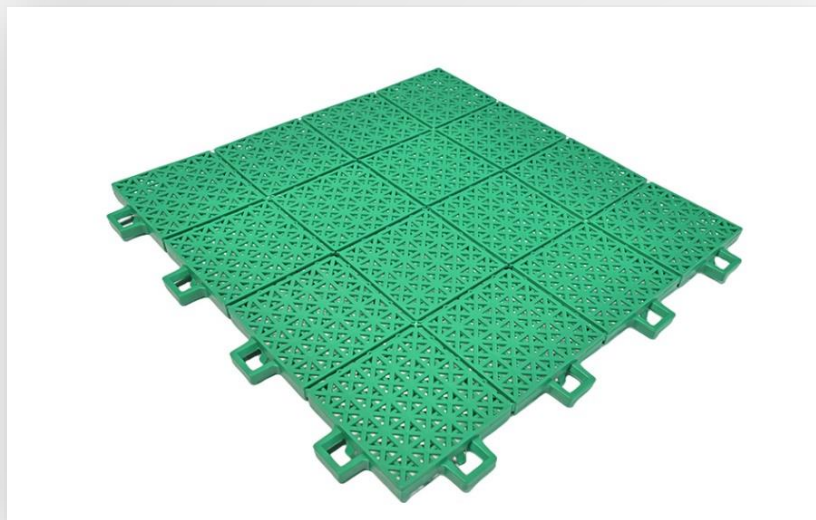

Four-square grid is a strong and durable universal outdoor suspended tile, which inherits the high load-bearing characteristics of the reinforced triangle, and strengthens the adaptability to thermal expansion and contraction.

Advantage	4 units reduce bulge problem caused by thermal expansion and cold contraction
Special	Moderately frosted triangular structure avoids contusion
Cost	middle
Courts	School / basketball court / tennis court / kindergarten
Dimension	25*25*1.35cm
Use	Short construction period and easy to maintain

For Facility

LOC4F

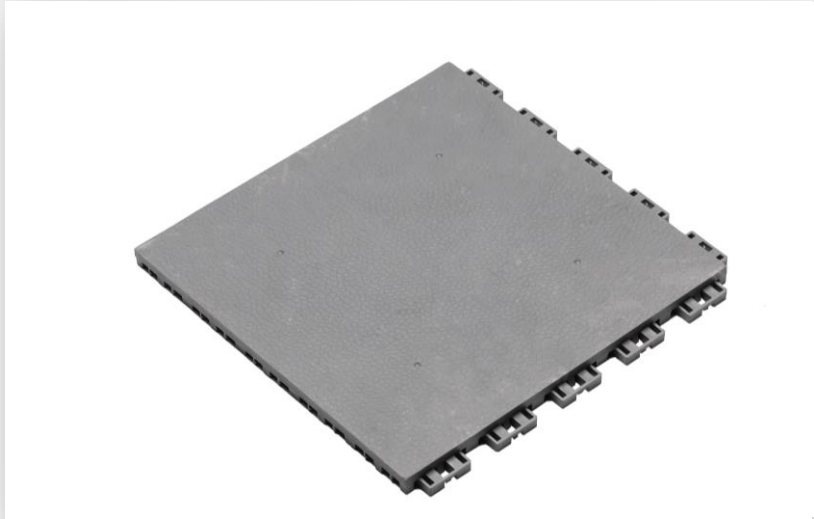

16 square grid floor composed of 16 small squares, which forms a force-bearing unit, reduce the bulging problem caused by thermal expansion and contraction in large venues. At the same time, the larger contact surface ensures anti-slip performance while reducing the injury to the body when falling .

Advantage	16 units reduce bulge problem caused by thermal expansion and cold contraction
Special	Large contact surface enhances the friction force and improves the safety of exercise
Cost	Low cost
Courts	School playground / Basketball Court
Dimension	40*40*1.45CM
Use	Short construction period and easy to maintain

For Courtyard

SVS3

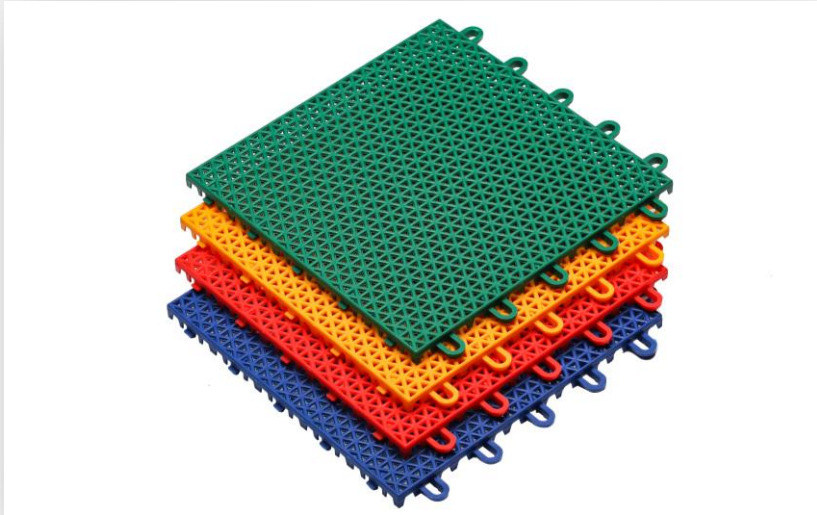

Starshine is a soft rubber floor for indoor and semi-outdoor use, with 100% flatness, 95% ball rebound force and 50% shock absorption, bringing an unparalleled basketball experience, which is even better than wooden flooring.

Advantage	95% ball elasticity and 50% shock absorption
Special	100% plane
Cost	luxury
Courts	Professional Basketball Court / Professional Pickle Ball Court
Dimension	30.5*30.5*1.6CM
Use	Short construction period and easy to maintain

For Street Game

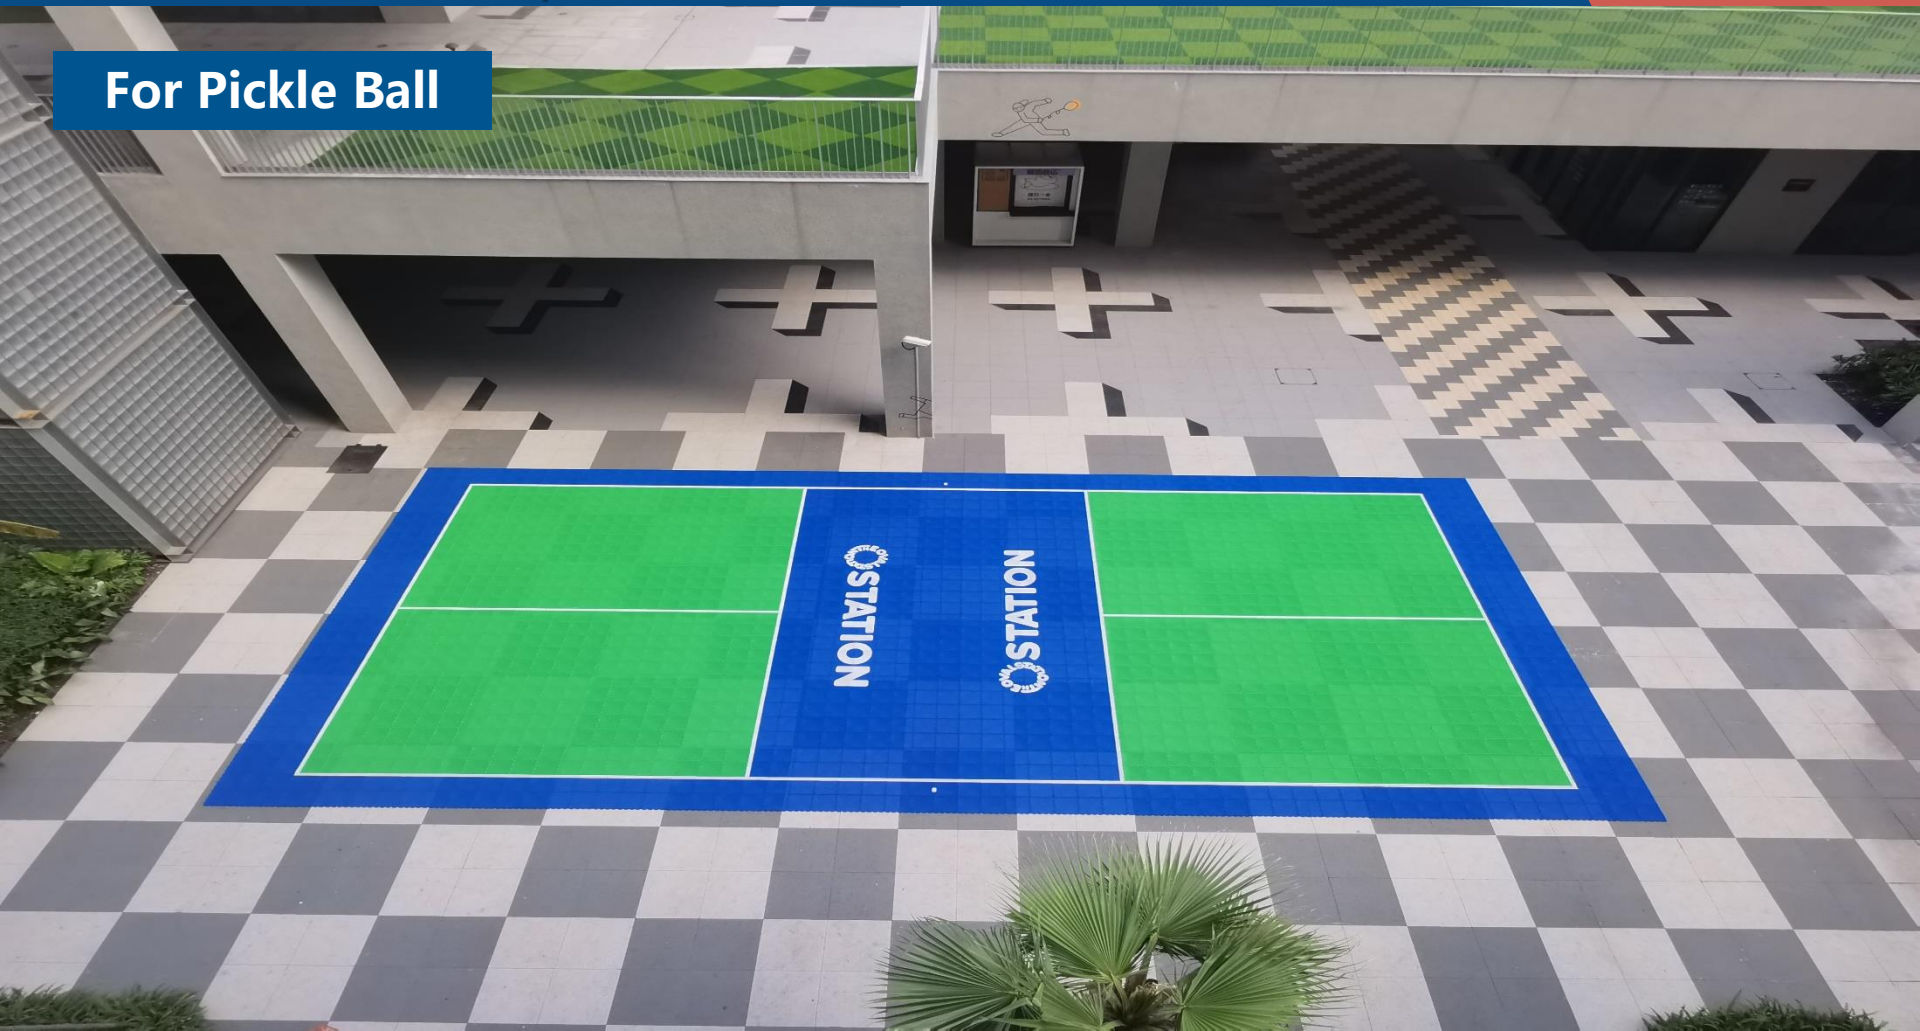

ANK2C

MiG-Reinforced Edition is a durable universal outdoor suspended floor, especially suitable for high-strength floors such as pickle ball, go-karts, roller skating, etc.

Advantage	650 support pillar give best stability over all tiles
Special	high resistance, high load bearing, high flatness
Cost	middle
Courts	General model, especially suitable for pickle ball / roller skating / go karts
Dimension	25*25*1.23cm
Use	Short construction period and easy to maintain

For Pickle Ball

asterism

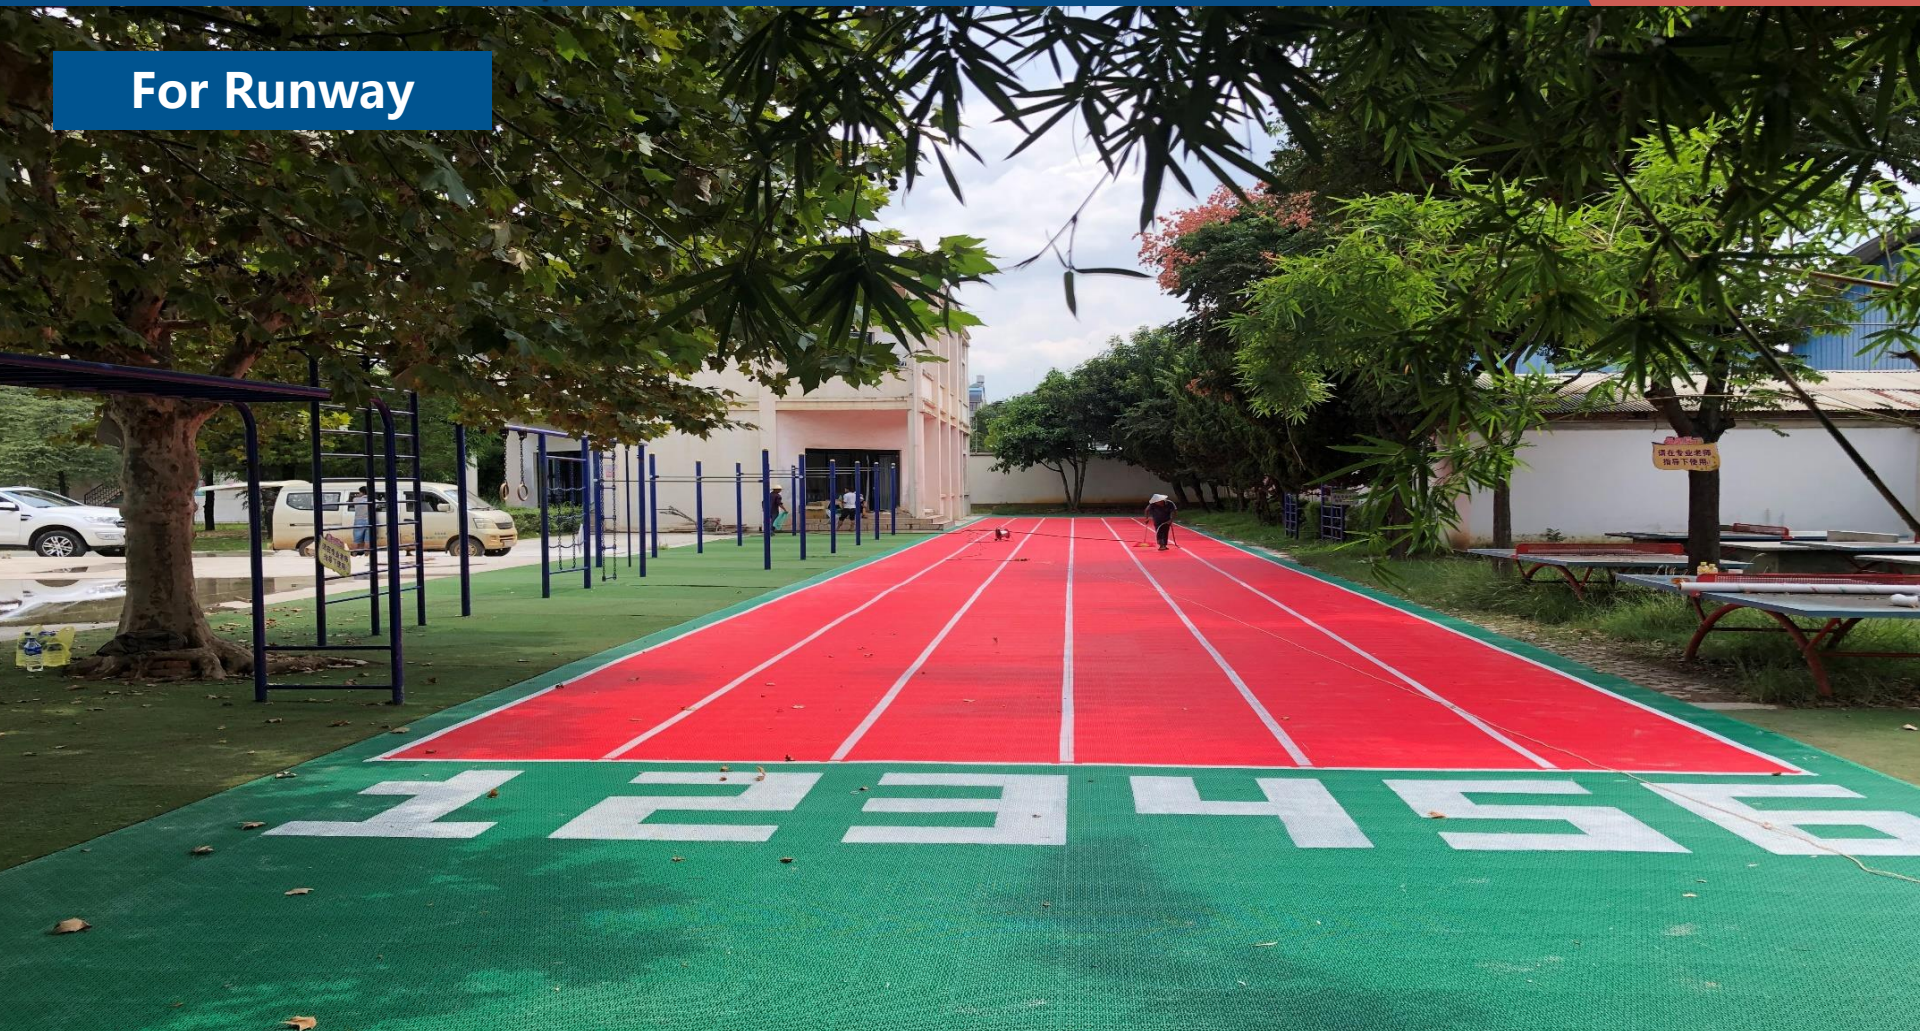

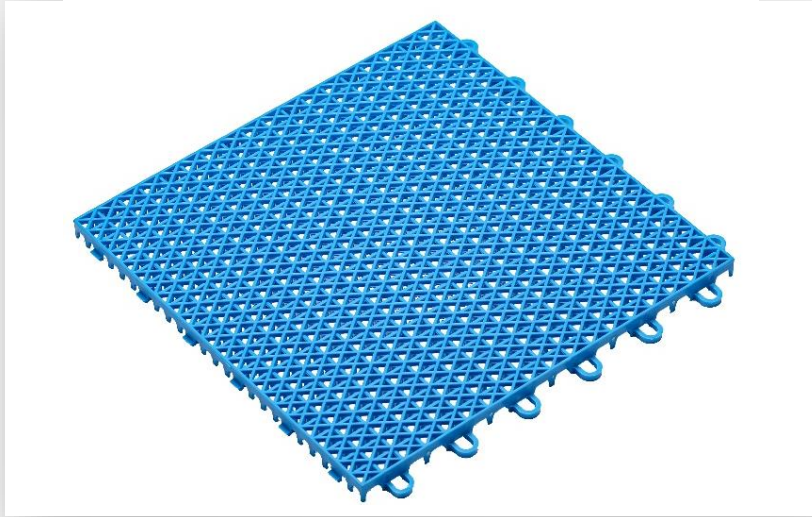

Astral is a soft rubber floor for outdoor use, with 95% flatness, 95% ball rebound force and 50% shock absorption, bringing an unparalleled basketball experience, which is even better than wooden flooring.

SVS2

Advantage	Good impact absorption, effectively reduce knee wear
Special	Large contact surface, super soft material
Cost	Luxury
Courts	Professional basketball court / Pickle Ball/Nursing home / Track / Fitness trail
Dimension	25*25*1.32CM
Use	Short construction period and easy to maintain

For Runway

ANK3

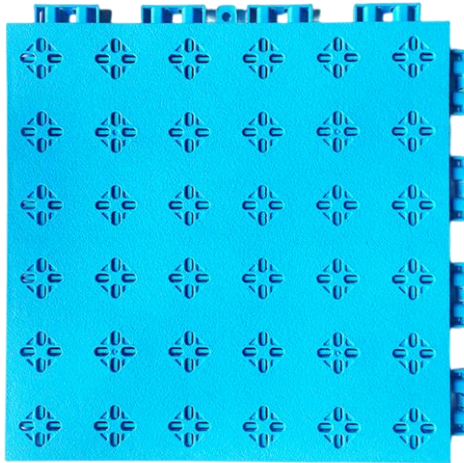

Diamond is a double-layer structure floor. The balanced linear shape of the diamond structure gives a sense of stability and harmony. 30.48CM = 1 inch, which is very suitable for European and American customers.

Advantage	847 support pillar ensure the load-bearing performance and pressure resistance
Special	Double layer design, improve impact absorption performance
Cost	secondary
Courts	Roller skating / basketball court
Dimension	30.48*30.48*1.58cm
Use	Short construction period and easy to maintain

For Roller Skating

SVS1 Cart

Polaris (Cart Version) has a large surface area and a coarse matte texture, making it ideal grip of children's go-karts.

Advantage	Super-large surface layer
Special	Great wet resistance and pressure resistance
Cost	Middle
Courts	kart
Dimension	25*25*1.05CM
Use	Short construction period and easy to maintain

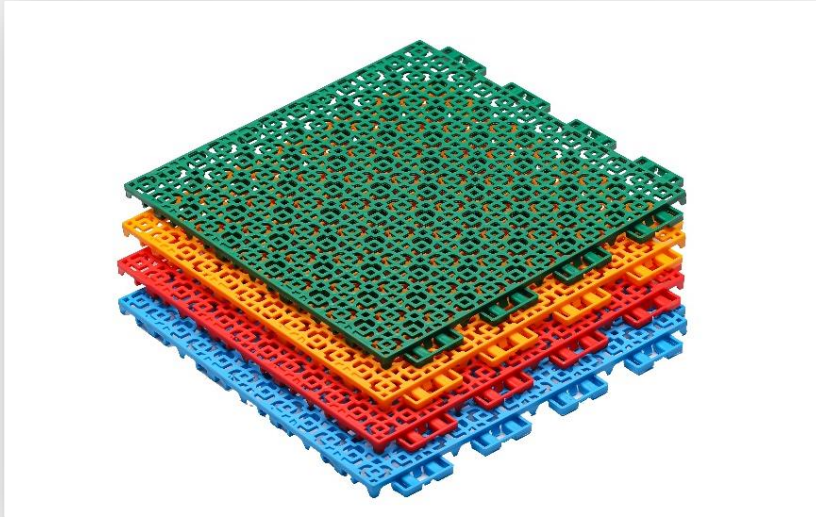

Go-Kart

HIHEAD

GO-KART

ANK4

Clover is a soft spliced floor with high flexibility and excellent elasticity, especially suitable for kindergarten, badminton and other floors.

Clover is as a symbol of luck, and we want every child to be with luck at all times.

Advantage	Four-leaf clover design bring best wishes for children
Special	Add 30% thermoplastic elastomer to improve the foot feeling
Cost	middle
Courts	Kindergarten / game court / badminton court
Dimension	25*25*1.32CM
Use	Short construction period and easy to maintain

For Kindergarten

SVS1 Soft

Polaris (Soft) is a soft rubber floor that can be rolled up, which effectively reduce accidental injuries , and is very suitable for early care institutions or kindergartens with high protection requirements.

Advantage	Can be rolled up, with a super-soft design
Special	Reduce the damage caused by children falling down
Cost	light luxury
Courts	Kindergarten / early care facilities / nursing homes
Dimension	25*25*1.05CM
Use	Short construction period and easy to maintain

For Early Care

Nursing Home

Court Dimension & Design

Color / LOGO Customize

Customize color according to your color card, customized color +10 yuan per square meter, and +7 days for delivery.

Be aware that due to many factors such as human eye and injection molding process, color of tiles may differ from the color card. There is a difference between the warranty of customized color and the regular color, please consult us for long-term outdoor use.

You can customize your LOGO, and the price is calculated by area, which is 300 yuan per square meter.

Price includes materials and LOGO construction costs. Due to the holes in the tile, it is recommended that the LOGO be the font.
